DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/16/2007 has been entered. Note that the Amendment after final 10/16/2007 has been made of record.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 5-7, 9-10, and 19-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Levine et al. (U.S. 5,868,754).

Levine et al discloses the claimed invention in figures 3 and 4, an elongated member (102) having a first portion (proximally to the proximal end) and a second portion (proximally to the distal end) with a diameter smaller than the first portion; wherein the distal end of the elongated member (102) defining a loop (104); closure member (304) is fixedly connected to the elongated member (102) at a plurality of spaced apart locations (as shown in figures 3 and 4) and wherein

the plurality of locations are disposed adjacent to each other to form the loop (104); wherein the width of the loop (104) is greater than the diameter of the first portion; and an intermediate portion defines a taper from the first portion to the second portion (as shown in figure 3).

Response to Arguments

Applicant's arguments with respect to claims 1-2, 5-7, 9-10, and 19-20 have been considered but are moot in view of the new ground(s) of rejection. The examiner must give the claimed limitations broadest reasonable interpretation in light of applicant's specification. For this reason, in view of the new ground of rejection as stated above, the Examiner has maintained the rejection under 35 U.S.C. 102 (b) as being anticipated by Levine et al. '754 for the reasons as set forth in the above statement.

Conclusion

2. This is a RCE of applicant's earlier Application No. 10/719,764. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3734

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
